                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                              646

Sequence 8, Application US/09835087
Patent No. US20020042370A1
GENERAL INFORMATION:
APPLICANT: Wayne W. Hancock
TITLE OF INVENTION: Method of Treating Graft Rejection Using
TITLE OF INVENTION: Inhibitors of CCR2 Function
FILE REFERENCE: 1855.2008-003
CURRENT APPLICATION NUMBER: US/09/835,087
CURRENT FILING DATE: 2001-09-24
